FILTRATION & SEPARATION 1994 INDEX

Volume 31 Index: 1994

January/February pp. 1 – 96, March/April pp. 97 – 200, May pp. 201 – 300, June pp. 301 – 424, July/August pp. 425 – 560, September/October pp. 561 – 664, November pp. 665 – 752, December pp. 753 – 840

Absolute filters. Melt-blown cartridge technology p. 326
Activated carbon. Air pollution control in museums and galleries p. 601
Activated carbon. Purification of industrial effluent using granular activated carbon and reactivation p. 637
Adsorption. Purification of industrial effluent using granular activated carbon and reactivation p. 637
Aerosols. Collection efficiency and pressure drop for a rotary-flow cyclone p. 631
Aerosols. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Air filters. Air pollution control in museums and galleries p. 601
Air filters. Clearing the air about fibre-glass air filters p. 129
Air filters. Lowering emissions – More effective air pollution control with fine fibre filter media p. 125
Air filters. Testing of HEPA and ventilation filters p. 781
Air pollution. Air pollution control in museums and galleries p. 601
Air pollution. Lowering emissions – More effective air pollution control with fine fibre filter media p. 125
Air pollution. Membrane systems for VOC recovery from air streams p. 231
Air pollution. Perspective on dioxin emissions from incineration processes p. 167
Automatic filters. Automatic filters to remove clams and algae from irrigation water p. 697
Automatic filters. Reverse side blockage of screens in automatic filtration p. 589
Automatic filters. The Triune filter – A system for cake-producing solid/liquid separation processes p. 691
Backwashing. SAFe sewage technology – The Par experience p. 587
Bag filters. Bag filtration in electrocoating applications p. 329
Bag filters. Particulate emissions within foundries – Dust arrestment requirements p. 737
Beer filtration. Comparison of modern beer filters p. 721
Beer filtration. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Beer filtration. New developments in filtration and separation in the beverage industry p. 609
Biological filtration. SAFe sewage technology – The Par experience p. 587
Biotechnology. Key technologies in purifying pharmaceutical process water p. 773
Candle filters. Comparison of modern beer filters p. 721
Candle filters. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Capillary filtration. Capillary filtration technology – Non-polluting to nature p. 135
Cartridge filters. Melt-blown cartridge technology p. 326
Cartridge filters. New test method for evaluation of water cartridge filters p. 427
Centrifuges. GMP and multi-purpose design vertical continuous decanters for batch processing p. 339
Centrifuges. Modelling slurry dewatering and cake growth in filtering centrifuges p. 75
Centrifuges. Solid-bowl centrifuges for wastewater sludge treatment p. 387
Centrifuges. Swarf handling system for Volvo Flygmotor p. 687
Ceramic filters. Advantages of an integrated system for hot gas filtration using rigid ceramic elements p. 25
Ceramic filters. Capillary filtration technology – Non-polluting to nature p. 135
Ceramic filters. Ceramic filters as support for a renewable bed of lime absorbent within a dry scrubbing environment p. 133
Ceramic filters. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Ceramic filters. Microfiltration of flue gases using ceramic membranes p. 597
Ceramic filters. Paint/water separation by ceramic microfiltration p. 227
Chemical industry. Magnetic wastewater treatment in the US chemical industry p. 605
Chemical industry. Melt-blown cartridge technology p. 326
Clean rooms. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Coal slurry. Cake uniformity in pressure filtration of coal slurry p. 819
Compressible filter cakes. Can cake compressibility be examined at the nonequilibrium thermodynamic position? p. 141
Compressible filter cakes. Model calculation of the compression behaviour of dust filter cakes p. 807
Compressible filter cakes. Simulation of compressible cake filtration p. 825
Computer modelling. Collection efficiency and pressure drop for a rotary-flow cyclone p. 631
Computer modelling. Development of a computer model for predicting the filtration characteristics of a suspension p. 57
Computer modelling. Model calculation of the compression behaviour of dust filter cakes p. 807
Computer modelling. Modelling slurry dewatering and cake growth in filtering centrifuges p. 75
Computer modelling. Simulation, modelling and sizing of pressure filters p. 393
Constant rate filtration. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Contamination monitoring. *Cryptosporidium* in water: Treatment and monitoring methods p. 283
Contamination monitoring. New test method for evaluation of water cartridge filters p. 427
Coolant filtration. Cleaning machine tool coolants at Rover Group p. 689
Coolant filtration. Filter belts and vacuum filter belts for the filtration of coolants in the metal processing industry p. 32
Copper smelting. Hard examination in copper metallurgy for pressure filters p. 35
Crossflow filtration. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Crossflow filtration. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Crossflow filtration. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Crossflow filtration. Fine filtration – An aid to effective waste management p. 31
Crossflow filtration. Permeate flux decay during crossflow microfiltration of a cationic surfactant dispersion p. 727
Crossflow filtration. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Crossflow filtration. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Cryptosporidium. *Cryptosporidium* in water: Treatment and monitoring methods p. 283
Cyclones. Collection efficiency and pressure drop for a rotary-flow cyclone p. 631
Dead-end filtration. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Decanters. GMP and multi-purpose design vertical continuous decanters for batch processing p. 339
Deep bed filters. The Howden-Wakeman filter in wastewater treatment p. 183
Deionisation. Key technologies in purifying pharmaceutical process water p. 773
Depth filtration. Fibrotex combats seasonal variations p. 236
Depth filtration. Melt-blown cartridge technology p. 326
Dewatering. Cake uniformity in pressure filtration of coal slurry p. 819
Dewatering. Hard examination in copper metallurgy for pressure filters p. 35
Dewatering. Modelling slurry dewatering and cake growth in filtering centrifuges p. 75
Dewatering. Municipal sludge properties and flocculation behaviour p. 647
Dewatering. Simulation, modelling and sizing of pressure filters p. 393
Dewatering. Solid-bowl centrifuges for wastewater sludge treatment p. 387
Dewatering. The Triune filter – A system for cake-producing solid/liquid separation processes p. 691
Dilution systems. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Dioxins. Perspective on dioxin emissions from incineration processes p. 167
Disc filters. Capillary filtration technology – Non-polluting to nature p. 135
Disc filters. Disc filter screens assist sugar production p. 683
Dry bag filtration. Particulate emissions within foundries – Dust arrestment requirements p. 737
Dust collectors. Trends towards rigidised filtration media dust collectors p. 179
Dust control. Particulate emissions within foundries – Dust arrestment requirements p. 737
Dust filter cakes. Model calculation of the compression behaviour of dust filter cakes p. 807
Effluent treatment. Pressure filtration in greater demand p. 239
Effluent treatment. Purification of industrial effluent using granular activated carbon and reactivation p. 637
Effluent treatment. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Effluent treatment. SAFe sewage technology – The Par experience p. 587
Electric fields. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Electrocoagulation. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Electrocoating. Bag filtration in electrocoating applications p. 329
Fabric filters. Lowering emissions – More effective air pollution control with fine fibre filter media p. 125
Fibre glass. Clearing the air about fibre-glass air filters p. 129
Filter belts. Filter belts and vacuum filter belts for the filtration of coolants in the metal processing industry p. 32
Filter cakes. Cake uniformity in pressure filtration of coal slurry p. 819
Filter cakes. Can cake compressibility be examined at the nonequilibrium thermodynamic position? p. 141
Filter cakes. Experimental study of cake formation in a Larox PF filter p. 67
Filter cakes. Model calculation of the compression behaviour of dust filter cakes p. 807
Filter cakes. Modelling slurry dewatering and cake growth in filtering centrifuges p. 75
Filter cakes. Simulation of compressible cake filtration p. 825
Filter cakes. Simulation, modelling and sizing of pressure filters p. 393
Filter cakes. The Triune filter – A system for cake-producing solid/liquid separation processes p. 691
Filter cloth. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813
Filter fabrics. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813
Filter media. Classification of porous media with through pore channels p. 243
Filter media. Clearing the air about fibre-glass air filters p. 129
Filter media. Lowering emissions – More effective air pollution control with fine fibre filter media p. 125
Filter media. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813
Filter media. Trends towards rigidised filtration media dust collectors p. 179
Filter plates. Disc filter screens assist sugar production p. 683

FILTRATION & SEPARATION 1994 INDEX

Filter presses. Pressure filtration in greater demand p. 239
Filter presses. Simulation, modelling and sizing of pressure filters p. 393
Filter testing. New test method for evaluation of water cartridge filters p. 427
Filter testing. Testing of HEPA and ventilation filters p. 781
Filter testing. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Filtration characteristics. Development of a computer model for predicting the filtration characteristics of a suspension p. 57
Fine filtration. Fine filtration — An aid to effective waste management p. 31
Flocculation. Municipal sludge properties and flocculation behaviour p. 647
Flotation. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Flue gases. Microfiltration of flue gases using ceramic membranes p. 597
Fouling. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Fouling. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Fouling. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Fouling. Permeate flux decay during crossflow microfiltration of a cationic surfactant dispersion p. 727
Foundries. Particulate emissions within foundries — Dust arrestment requirements p. 737
Heavy metals. Heavy metal recovery in the US p. 585
Heavy metals. Magnetic wastewater treatment in the US chemical industry p. 605
HEPA filters. Testing of HEPA and ventilation filters p. 781
Horizontal leaf filters. Comparison of modern beer filters p. 721
Hot gas filtration. Advantages of an integrated system for hot gas filtration using rigid ceramic elements p. 25
Hot gas filtration. Ceramic filters as support for a renewable bed of lime absorbent within a dry scrubbing environment p. 133
Hot gas filtration. Lowering emissions — More effective air pollution control with fine fibre filter media p. 125
Hot gas filtration. Perspective on dioxin emissions from incineration processes p. 167
Hot gas filtration. Trends towards rigidised filtration media dust collectors p. 179
Hydrocyclones. Hydrocyclone with high sharpness of separation p. 733
Incineration. Ceramic filters as support for a renewable bed of lime absorbent within a dry scrubbing environment p. 133
Incineration. Heavy metal recovery in the US p. 585
Incineration. Perspective on dioxin emissions from incineration processes p. 167
Industrial effluent. Purification of industrial effluent using granular activated carbon and reactivation p. 637
Integrated pollution control. Implementing integrated pollution control p. 175
Legislation. Implementing integrated pollution control p. 175
Magnetic separation. Magnetic wastewater treatment in the US chemical industry p. 605
Membranes. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Membranes. Cost-saving environmental solution for petrochemical disposal site p. 583
Membranes. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Membranes. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Membranes. Fine filtration — An aid to effective waste management p. 31
Membranes. Membrane systems for VOC recovery from air streams p. 231
Membranes. Membrane technology for water treatment p. 223
Membranes. Microfiltration of flue gases using ceramic membranes p. 597
Membranes. Paint/water separation by ceramic microfiltration p. 227
Membranes. Permeate flux decay during crossflow microfiltration of a cationic surfactant dispersion p. 727
Membranes. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Metal processing. Filter belts and vacuum filter belts for the filtration of coolants in the metal processing industry p. 32
Metal processing. Particulate emissions within foundries — Dust arrestment requirements p. 737
Metal-working fluids. Microscreen filtration p. 599
Microfiltration. Crossflow microfiltration of beer: Laboratory-scale studies on the effect of pore size p. 399
Microfiltration. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Microfiltration. Microfiltration of flue gases using ceramic membranes p. 597
Microfiltration. Paint/water separation by ceramic microfiltration p. 227
Microfiltration. Permeate flux decay during crossflow microfiltration of a cationic surfactant dispersion p. 727
Mineral extraction. Pressure filtration in greater demand p. 239
Mineral processing. Capillary filtration technology — Non-polluting to nature p. 135
Mineral processing. Hydrocyclone with high sharpness of separation p. 733
Molecular sieves. Molecular sieve development p. 701
Nanofiltration. Membrane technology for water treatment p. 223
Nanofiltration. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Needlefelts. Lowering emissions — More effective air pollution control with fine fibre filter media p. 125
Needlefelts. Trends towards rigidised filtration media dust collectors p. 179
Nominal filters. Melt-blown cartridge technology p. 326
Oil/water separation. Pollution solution for airport site run-off waters p. 139
Oil/water separation. Swarf handling system for Volvo Flygmotor p. 687
Optical particle counters. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Paint filtration. Bag filtration in electrocoating applications p. 329
Paint filtration. Paint/water separation by ceramic microfiltration p. 227
Particle generators. Verification and inspection of safety workbenches and laminar flow boxes p. 777
Petrochemicals. Hydrocyclone with high sharpness of separation p. 733
Petrochemicals. Molecular sieve development p. 701
Pharmaceuticals. Key technologies in purifying pharmaceutical process water p. 773
Plate separators. Pollution solution for airport site run-off waters p. 139
Pollution cleanup. Cost-saving environmental solution for petrochemical disposal site p. 583
Pollution cleanup. Heavy metal recovery in the US p. 585
Pressure filters. Experimental study of cake formation in a Larox PF filter p. 67
Pressure filters. Hard examination in copper metallurgy for pressure filters p. 35
Pressure filters. Simulation, modelling and sizing of pressure filters p. 393
Pressure filtration. Cake uniformity in pressure filtration of coal slurry p. 819
Pressure filtration. Pressure filtration in greater demand p. 239
Pressure filtration. Simulation of compressible cake filtration p. 825
Reverse osmosis. Cost-saving environmental solution for petrochemical disposal site p. 583
Reverse osmosis. Key technologies in purifying pharmaceutical process water p. 773
Reverse osmosis. Membrane technology for water treatment p. 223
Rigid filter elements. Advantages of an integrated system for hot gas filtration using rigid ceramic elements p. 25
Rigid filter elements. Trends towards rigidised filtration media dust collectors p. 179
Rotary-flow cyclones. Collection efficiency and pressure drop for a rotary-flow cyclone p. 631
Scale-up. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Screen blockage. Reverse side blockage of screens in automatic filtration p. 589
Screens. Disc filter screens assist sugar production p. 683
Screens. Microscreen filtration p. 599
Screens. Reverse side blockage of screens in automatic filtration p. 589
Scrubbers. Ceramic filters as support for a renewable bed of lime absorbent within a dry scrubbing environment p. 133
Self-cleaning. Automatic filters to remove clams and algae from irrigation water p. 697
Self-cleaning. Reverse side blockage of screens in automatic filtration p. 589
Self-cleaning. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Sewage treatment. SAFe sewage technology — The Par experience p. 587
Sewage treatment. The Howden-Wakeman filter in wastewater treatment p. 183
Simulation. Development of a computer model for predicting the filtration characteristics of a suspension p. 57
Simulation. Model calculation of the compression behaviour of dust filter cakes p. 807
Simulation. Simulation, modelling and sizing of pressure filters p. 393
Simulation. Simulation of compressible cake filtration p. 825
Sludges. Cost-saving environmental solution for petrochemical disposal site p. 583
Sludges. Municipal sludge properties and flocculation behaviour p. 647
Sludges. Solid-bowl centrifuges for wastewater sludge treatment p. 387
Slurries. Cake uniformity in pressure filtration of coal slurry p. 819
Slurries. Experimental study of cake formation in a Larox PF filter p. 67
Slurries. Hard examination in copper metallurgy for pressure filters p. 35
Slurries. Modelling slurry dewatering and cake growth in filtering centrifuges p. 75
Slurries. Studies of constant rate filtration in dead-end and crossflow modes p. 643
Slurries. The Triune filter — A system for cake-producing solid/liquid separation processes p. 691
Solid/liquid separation. Cake uniformity in pressure filtration of coal slurry p. 819
Solid/liquid separation. Capillary filtration technology — Non-polluting to nature p. 135
Solid/liquid separation. Development of a computer model for predicting the filtration characteristics of a suspension p. 57
Solid/liquid separation. Experimental study of cake formation in a Larox PF filter p. 67
Solid/liquid separation. Simulation, modelling and sizing of pressure filters p. 393
Solid/liquid separation. Simulation of compressible cake filtration p. 825
Solid/liquid separation. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813
Solid/liquid separation. The Howden-Wakeman filter in wastewater treatment p. 183
Solid/liquid separation. The Triune filter — A system for cake-producing solid/liquid separation processes p. 691
Sugar processing. Disc filter screens assist sugar production p. 683
Surface filtration. Melt-blown cartridge technology p. 326
Surfactant dispersions. Permeate flux decay during crossflow microfiltration of a cationic surfactant dispersion p. 727
Suspensions. Development of a computer model for predicting the filtration characteristics of a suspension p. 57
Swarf handling. Swarf handling system for Volvo Flygmotor p. 687
Tanning effluent. Pressure filtration in greater demand p. 239
Textile dyeing. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Textile filter media. Lowering emissions — More effective air pollution control with fine fibre filter media p. 125
Textile filter media. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813
Ultrafiltration. Application of electric fields and vortex mixing for enhanced ultrafiltration p. 273
Ultrafiltration. Bag filtration in electrocoating applications p. 329
Ultrafiltration. Key technologies in purifying pharmaceutical process water p. 773
Ultrafiltration. Membrane technology for water treatment p. 223
Vapour recovery. Membrane systems for VOC recovery from air streams p. 231
Ventilation filters. Testing of HEPA and ventilation filters p. 781
VOC recovery. Membrane systems for VOC recovery from air streams p. 231

FILTRATION & SEPARATION 1994 INDEX

Vortex finders. Hydrocyclone with high sharpness of separation p. 733
Waste management. Fine filtration – An aid to effective waste management p. 31
Wastewater treatment. Electrocoagulation and flotation: Applications in crossflow microfiltration p. 269
Wastewater treatment. Magnetic wastewater treatment in the US chemical industry p. 605
Wastewater treatment. Microfiltration of flue gases using ceramic membranes p. 597
Wastewater treatment. Municipal sludge properties and flocculation behaviour p. 647
Wastewater treatment. Paint/water separation by ceramic microfiltration p. 227
Wastewater treatment. Purification of industrial effluent using granular activated carbon and reactivation p. 637
Wastewater treatment. Recycling of wastewaters from textile dyeing using crossflow membrane filtration p. 593
Wastewater treatment. SAFe sewage technology – The Par experience p. 587
Wastewater treatment. Solid-bowl centrifuges for wastewater sludge treatment p. 387
Wastewater treatment. The Howden-Wakeman filter in wastewater treatment p. 183
Water filters. New test method for evaluation of water cartridge filters p. 427
Water treatment. Automatic filters to remove clams and algae from irrigation water p. 697
Water treatment. *Cryptosporidium* in water: Treatment and monitoring methods p. 283
Water treatment. Fibrotex combats seasonal variations p. 236
Water treatment. Membrane technology for water treatment p. 223
Yarns. Some aspects of the design of filter fabrics for use in solid/liquid separation processes p. 813

List of 1994 Authors:

Akay, G. – p. 727
Aldridge, J. – p. 587
Ay, P. – p. 647
Baker, R.W. – p. 231
Bellhouse, B.J. – p. 273
Bigg, M.G. – p. 175
Bishop, A.J. – p. 737
Blattner, J. – p. 777
Bolduan, P. – p. 597
Brocheton, S. – p. 721
Burgess, D.R. – p. 183
Burrell, K.J. – p. 399
Comb, L.F. – p. 223
Cox, R.J. – p. 329
Cross, J. – p. 773
Dilger, F. – p. 125
Dolphin, D. – p. 31
Durst, M. – p. 25
Faulder, C. – p. 326
Flörke, J. – p. 597
Grasmick, A. – p. 269
Gregory, J. – p. 283
Groppo, J.G. – p. 819
Hackl, A. – p. 807
Hamerlinck, Y. – p. 637
Hardman, E. – p. 813
Hartley, K. – p. 683
Hattersley, R. – p. 129
Hemme, A. – p. 647
Hermia, J. – p. 721
Hillmer, M.J. – p. 167
H-Jones, P. – p. 167
Höflinger, W. – pp. 609, 807
Holdich, R. – p. 825
Hunt, T. – p. 427
Ingleson, L. – p. 589
Jourdan, M.-F. – p. 427
Jurado, J. – p. 273
Kaschemekat, J. – p. 231
Keinänen, T. – p. 67
Leith, D. – p. 631
Liang-Yin Chu – p. 733
Matsis, V.M. – p. 643
Maurer, C. – p. 32
Muilwijk, F. – p. 227
Nield, P. – p. 691
Nielson, C.-E. – p. 593
Nooijen, W.F.J.M. – p. 227
Nordén, H.V. – p. 67
Paavola, E. – p. 67
Parekh, B.K. – p. 819
Pettit, K. – p. 167
Peuchot, C. – p. 427
Pouët, M.-F. – p. 269
Qian Luo – p. 733
Ramachandran, G. – p. 631
Rantala, P. – p. 135
Raynor, P.C. – p. 631
Reed, R.J.R. – p. 399
Retter, E.A. – p. 387
de Reuver, J.L. – p. 605
Rushton, A. – p. 643
Schilp, R. – p. 387
Schulz, K. – p. 25
Simmons, V.L. – p. 231
Singleton, A. – p. 601
Smith, C.R. – p. 179
Stark, R.J. – p. 183
Stöcklmayer, Ch. – p. 807
Sung, D.J. – p. 819
Svarovsky, L. – p. 57
Tarleton, E.S. – p. 393
Versen, R. – p. 129
Wakeman, R.J. – pp. 75, 183, 393, 727
Walker, A.J. – p. 57
Wijmans, J.G. – p. 231
Yelshin, A. – pp. 141, 243
